

Maria Pohranychna

Product Designer

As a Product Designer, I ask "why" before "how." I design with data, stay close to business context, and ship with impact. From early discovery to final handoff — I make sure the right problem gets solved, not just the obvious one.

Communication skills
Understanding business value
Time management

WORK EXPERIENCE

OCTOBER 2023 – PRESENT

Product Designer

Lenovo Ukraine - E-commerce · Portal

Adding new functionality, redesigning Lenovo products, improving existing functionality, working with user path logic, adding functionality to the admin panel, and organizing files in Figma. Close communication with manager and developers. Presentation of tasks and discussion of problems with the product owner. Communication with the marketing department.

AUGUST 2023 – OCTOBER 2024

Part-time

Product Designer

SnapVault — Mob. App iOS

Developing a new product: conducting research, creating and testing hypotheses, building product functionality, designing wireframes and layout structure (excluding final visual UI). Communication with clients, managers, and developers to discuss and approve design decisions.

UX Researcher

Breazen — Mob. App iOS

Identifying and analyzing problems in the current application design, creating hypotheses, conducting research, and close communication with the client.

JUNE 2023 – MAY 2024

UX/UI Designer

Team Challenge - Marketplace

Teamwork and conducting UX research. Developing functionality, constant communication with developers and other team members on project implementation. Work with the organization of elements in Figma files.

DECEMBER 2021 – MAY 2023

UX/UI Designer

Freelance

Analyzed target audiences, conducted competitive analysis and user research, and created website designs that solve business problems and are intuitive for users.
